

SMALL SYSTEMS

Optimize Performance & Access Funding to Improve Small System Operations

For more than 20 years, AWWA and the **Partnership for Safe Water** have helped large, medium and small sized utilities learn how to operate efficiently with comprehensive programs developed *by utilities, for utilities*. Now, AWWA Sections, the *Partnership* and USDA bring the same insights and guidance to small systems across the U.S. and in the Alabama-Mississippi Section AWWA to help optimize operations.

At the heart of the *Partnership* is the self-assessment process. Utilities have effectively used self-assessments to identify needs and performance-limiting factors. These needs are then addressed in the form of an action plan that aids in the continuous improvement effort towards optimized operations. Attend this introductory workshop to learn how supervisors and operators can access USDA improvement funds, and how the *Partnership* helps utilities optimize systems today and in the future.

Alabama-Mississippi AWWA Section, Partnership for Small Systems/USDA Optimization Workshop: Biloxi, Mississippi

Mississippi State University | Tuesday, May 21, 8:30 a.m. – 3:00 p.m.
