On The Cover
Happy Holidays!!

First of all, let me thank Randy Chafin, his spouse Janet and the entire committee for their work on behalf of the Alabama/ Mississippi Section throughout this past year. The effort to provide additional educational opportunities for members of the section was appreciated by the many members that attended these sessions. Randy was also instrumental in the hiring of our first section staff person, Ken McCool. Ken will be a valuable asset for the section as we move forward. The conference planning committee members are also to be commended for a successful annual conference in Sandestin, Florida. From the Water for People golf tournament on Sunday to the technical sessions to the banquet on Tuesday evening and everything in between, a fun, relaxed and informative conference was experienced.

I am excited and honored to be serving as your Section Chair for the next year. Our 2005 Conference Planning Committee has already started making plans for the annual meeting at the Pearl River Resort in Choctaw, Mississippi. Please put October 2-4, 2005 on your calendar now. You will not want to miss this event. Bill Moody is chairing the program committee and is putting together an exceptional program. Danny Hutcherson is recruiting exhibitors to fill up our huge exhibit space. And we are also planning some entertainment events and a spouses program that you will not forget.

Congratulations to our newest trustee, Tom Walters. Tom has served this section of AWWA in several capacities, most recently as Secretary/Treasurer. He will serve a two-year term as the Alabama Trustee-at-Large. Welcome back to the Board, Tom.

As I mentioned in my acceptance remarks at the Sandestin Conference, the Board of Trustees is committed to reversing some of the trends of trade associations similar to the American Water Works. One of the trends is declining volunteerism. We want to increase the volunteerism of our membership by involving more people on the section committees. “Give yourself a gift; become an active part of a committee”.

We want to address the trend of aging membership by focusing on increasing our membership, particularly in the area of our water system operators and young professionals. Randy Chafin, our past...
What a wonderful conference! And a big thanks to the Chafins for their tireless effort to make this one of the better conferences.

AWWA’s representative, Nilaksh Kothari and his wife Dipaka, were very gracious and I think they left Northwest Florida with a great impression of our section.

I reflected back on Nilaksh’s talk on Monday morning. It was one of the best we have had in years. Recall that he challenged us to be good water professionals and to take every opportunity to communicate the true value of water as it relates to reliability of our infrastructure, the security of our water systems, the management of our resources, and ability to deliver safe water. That is a key theme for our section.

The future trends and issues were highlighted at the conference in the many presentations, in the various forums, and the exhibit halls. AWWA’s recently completed study supported those same trends and issues which include:

- Infrastructure management
- Environmental regulations
- Reorganization of water systems
- Good customer relations
- Work environment – diversity, health & safety, training, etc
- Management, training, and financial planning
- Total water resource management

One of the big issues facing the AWWA Board of Directors is the strategic plan for the future. There are five key issues that will need to be addressed by the plan:

1. Declining volunteers
2. Lack of awareness of AWWA by decision makers
3. Competing organizations
4. Revenue sources
5. Aging membership

The Board of Directors will be meeting in mid-January and if any of you have issues or opinions related to these topics please forward them to me. I will make sure that the Board is aware of the issues and concerns of the Alabama-Mississippi Section.

Have a Happy Holidays!

Blake Jeffcoat
bjeffcoa@CH2M.com
Ivan, Charlie, Frances, etc.

What a fantastic conference! The facilities and staff at the Grand Sandestin Golf & Beach Club are second to none and I hope everyone enjoyed it as much as I did. Randy, Janet and the entire planning committee of volunteers are to be commended for a job well done.

The trainload of hurricanes leading up to our conference date did no damage to Sandestin, but more than just a few members did stay home. I would guess the fear of the unknown may have been too much for some, particularly since many travel routes were closed or detoured. That still didn’t deter the many who did attend, including a member couple who biked all the way from Vicksburg!

Involve Yourself!

Throughout the entire conference, I became more acquainted with a host of our younger members and, in some cases, was introduced to brand new members wanting to know how they might become more involved with the section. To me, it is exciting to see our young operators and professional people offering their ideas and energy to this organization. In fact, the vitality and perpetuation of our section depends largely upon their participation.

Involvement from all sectors of membership is an absolute necessity! If you are interested in serving on an AL/MS AWWA committee, please drop me or one of your Board members a landline or e-mail and I will let your interest be known to our committee chairs.

The website (www.almsawwa.org) will be updated around the end of the year with all the new Board and Committee Chairs and links to their e-mails. Ours Events section will also post educational opportunities available though the Section, AWWA and other water-related organizations. Additionally, we are able to offer advertising on the site as well; believe me, the site is seen by many as the amount of phone calls and e-mails I receive from around the nation, Canada and South America can evidence!

Membership Restructuring

On the national level, AWWA over the past year has heard from its Ad Hoc Committee on Membership Restructuring. This task is being undertaken to propose simplification to AWWA’s membership structure. The membership application, for example is cumbersome, at best with 43 unique benefit offerings and 18 differing assessments, depending on which section the applicant is in. The present structure has a grand total of 33 membership grades.

Our Board will be reviewing various choices of tiered structures and standardized grades over the next few months that have been offered by national. They will have an opportunity for input and recommendations along the way, ultimately helping national to come up with a simpler membership hierarchy.

Our recent conference also marks my first full year as section manager for AL/MS AWWA. As I’ve mentioned in past articles, behind-the-scene activities have introduced me to a whole new world of AWWA. It has also shown me the added-value AWWA gives its membership.

Scan The American Water Works Association’s website (www.awwa.org) and explore a vast toolbox of benefits.

Ken McCool, Section Manager
P.O. Box 430, Cleveland, MS 38732
Phone: 662.THE.H201
Fax: 662.843.4201
Email: almsawwa@cableone.net
The meeting convened at 11:10 a.m. at the Sandestin Resort in Destin, Florida.

**Randy Chafin, Section Chair,** called the business meeting to order, and opened the meeting with a brief general report on Section activity, including that the paid staff Section Manager, Ken McCool, had been very active on behalf of the Section, displaying a booth at the MS Water Pollution Control Operators Association meeting in the summer. Also reported that McCool and Chafin had journeyed to Washington DC for the AWWA Fly-In to visit congressmen from Alabama and Mississippi. The Section has also been active in AL Legislature in securing protection for public water utilities from having to disclose to the public their Vulnerability Assessment.

A motion was made and seconded to dispense from the reading of the business meeting minutes from 2003. The motion was passed unanimously. The Chair asked for a report from the following chairs:

**Blake Jeffcoat, Director,** expressed his thanks and compliments to Denson Robinson for his years of service to the Section as Director. AWWA is going through a very important Strategic Plan process right now, and Blake will attend a January retreat on the subject of where does AWWA want to be years from now. Encouraged the members to let Blake know of any issues or concerns that he can bring to the attention of AWWA national.
### A Few Special Words of Thanks!

The Alabama/Mississippi Section of the American Water Works Association wishes to thank all of the companies whose generous support made the 2004 Annual Conference a huge success and memorable experience for all who attended...........

**Our Section continues to grow because of your strong support!**
chair, has agreed to lead this initiative.

Also, we want to provide additional educational opportunities for the membership so that everyone feels that they are receiving value from their membership in our organization. We will continue to build a relationship with competing organizations such as the Mississippi Water Pollution Control Operators Association and the Alabama and Mississippi Rural Water Associations. Our hope is that we can expand our opportunities for education and training by working together with these groups.

The Memorial Scholarship will continue to provide funds to worthy students in our two states and our fund raising efforts to support Water for People, AWWA’s charity-of-choice, will help those less fortunate to develop their own supply of clean, safe drinking water.

The strategic plan that was developed by the Section leadership in 1998 will be reviewed this next year and updated. As we move toward the future, we must continually examine our goals and make adjustments.

Finally, let me remind you to contact me or any member of the Board if you have an interest in becoming involved with the work of the Alabama/Mississippi Section. We are committed to involving more people and would welcome your help and ideas on improving our service to the membership. If you have any recommendations for the conference or technical program next year at Pearl River Resort, please let us know.

Section Chair Randy Chafin presents 30-year Life Awards to Mr. F. W. Dougherty (above left) and Mr. James W. Roberson (above right).

The Section had five members who were eligible to receive the 30-year life award. Two of the recipients were present to receive their awards in person:

**Mr. F. W. Dougherty**  
*F. W. Dougherty Eng. & Assoc.*  
*Birmingham, AL*

**Mr. James W. Roberson**  
*Hartselle Utilities*  
*Hartselle, AL*

The following individuals were unable to personally receive their awards:

**Mr. Wendell H. Duke**  
*Hendon Eng. Assoc., Birmingham, AL*

**Mr. Gene R. Hanson,**  
*Retired, Birmingham WWSB*  
*Oneonta, AL*

**Mr. Daniel M. Romes**  
*Gove Associates*  
*Lillian, AL*
This year’s George Warren Fuller Award went to Robert “Bob” Giglio, a gentleman we all know and respect. He has commanded respect by saying what has to be said and doing what has to be done in regard to the growth of this Section and the contentment and happiness of its conference-bound membership.

He has spent enormous amounts of time and energy directing his personal efforts toward enhancements to the Alabama-Mississippi Section since joining the American Water Works Association in 1968.

Bob has also been extremely active working with his peers within the service-provider community and enlisting their aid and support in the Section’s foundation.

His leadership and volunteering style have helped your section remain vibrant and responsive to the needs of its membership, having served on numerous committees, including multiple conference planning committees. Those who have served on those committees along with him can also tell you he can find more ways than anyone to get around hotel policies for handling “corkage” fees for our “Meets & Greets”…something akin to the “rum-running” of the twenties…but strictly legal, you understand.

Bob was born in the “Peach State” in a city named for the captain of the three ships known to have first discovered America. He graduated from high school along with what those who know him well consider a mirror-image of himself! He and his twin brother hold a yet-standing record as being the only twins to have served on the Columbus High School cheerleading squad. His big sister has noted a cute story that, as she would accompany their mother with the boys in their stroller, folks would pass and say, “My, how cute.” Sis would then respond, “… would you like to buy them?”

Bob had a career with the United States Marine Corps and later started a new career in water works sales with the Columbus Iron Works and the Hays Brass Company. He and a partner later founded their own company representing manufacturers from across the nation. The company was originally based in Jackson, Mississippi, before later relocating to Mobile, Alabama.

In 2003 Bob retired and moved to Opelika, Alabama, to remodel a new home in a setting where he can relax and observe the turkey and deer through his kitchen window. In addition, he is also now in a better position to be nearer his mother to run errands, share companionship and look after her general welfare.

Bob has two sons, one daughter, four grandchildren and is anticipating the arrival of a fifth after the first of the new year.

The Alabama-Mississippi Section of the American Water Works Association is proud to present the George Warren Fuller Award to Robert “Bob” Giglio.
The long-term value of a major capital investment is the ability to adapt to changing needs. Neptune recognizes that no single approach can address the wide range of needs for all utilities, so we’ve created a system that allows you to implement a data collection system that best suits your needs.

Water Loss Management • Conservation • Drought Management

Get Closer to Your Customers with the System Integrity of an ARB® Water Revenue System™.
Renee is originally from Tacoma, Washington where she received a Bachelor of Science degree in Biology in 1993 from the University of Puget Sound. She then attended the University of Alabama at Birmingham where she received a Master of Science in Public Health in 1996 for which she spent three months in Guatemala for research on her thesis.

After three years working as an Environmental Health Specialist, Renee returned to school at UAB and received a Master of Science in Civil Engineering in 2001. She is now a PhD candidate at the University of Alabama in the department of Civil and Environmental Engineering.

Her research at UA has included the association of nutrients and heavy metals with stormwater particulates and two EPA-funded projects on inappropriate discharges and the evaluation of NPDES Phase 1 MS4 stormwater data.

The American Water Works Association honors its own who have achieved 50 years of continuous membership with the Association. The Alabama-Mississippi Section is proud to present the Gold Water Drop Award to Mr. Jack Whiting MacKay, Sr.

Mr. MacKay was born in Asheville, North Carolina, on January 24th, 1910, and graduated from Danville (VA) Military Institute.

He attended Campbell College, the University of North Carolina, Western Michigan University and the University of Alabama where he received three engineering degrees.

At Alabama, he was vice-president of the Senior Class, a member of the honor committee, Theta Tau, Tau Beta Pi Honorary Scholastic Society and an instructor for three years in the College of Engineering. In 1936, he became the 1st instructor of an engineering course at the University’s Birmingham Extension (later UAB). He chaired the Civil Engineering Advisory Committee, in the late eighties was President of the Golden Fifties Club and, during the 150th anniversary of the College of Engineering, he was selected as one of the 150 Distinguished Engineering Fellows. He is a member of the Capstone Engineering Society.

Also in 1936, Mr. MacKay began a 39-year career with American Cast Iron Pipe Company, moving through the ranks from engineering trainee to Vice President and General Sales Manager, member of the Board of Management and then secretary of the Board of Directors for nineteen years. During his tenure with ACIPCO, he distinguished himself by inventing and patenting the Fastite Joint and turning the whole water and gas pipe industry from gray iron to ductile iron whereby ACIPCO became the first commercial manufacturer of D.I. pipe in the U.S. He additionally
expanded the company’s steel pipe line by creating the American Steel Pipe Division and American Flow Control. ACIPCO honored him at his 1975 retirement for his “unique qualities in Sales and Engineering” in appreciation of his “outstanding leadership which provided full employment and growth for ACIPCO.”

He is a Fellow and Life Member of the ASCE, former member of the Pipeline Planning Committee, chairman of its Publication Committee, and co-author of Pipeline Specifications. He published the first history of the Alabama section. In 1968, he was nominated as the ASCE candidate for Birmingham Engineer of the Year and is a still licensed Professional Engineer for the State of Alabama.

He was president of the Alloy Casting Institute, chaired the Public Relations and Advertising Committee of the Cast Iron Pipe Research Association, and is, of course, a Life Member of the American Water Works Association and was awarded its National Distribution Award for his 1956 publication the *Development and Use of Specifications for Cast Iron Pipe and Fittings*.

In 1938, he wed Gweneth Moxley of Birmingham and they have three children, Marian, Richard and McNeill; he is an Elder and member of Shades Valley Presbyterian Church, the Birmingham Country Club, Birmingham Monday Morning Quarterback Club, Birmingham Kiwanis, and Sons of the Revolution.

“*A few ounces of prevention is worth pounds of cure*”
WaterSentry™ is the first system of its kind to automatically and continuously test for toxic contaminants in drinking water supplies. This system provides a new level of security and allows agencies to respond early to potential threats.

The monitoring unit, which houses the sensor sub-system, operates autonomously at remote water sites. It can detect toxins within minutes, immediately alerting the control station over a fixed or wireless network.

WaterSentry™ provides a new and valuable level of water security for civilian and military drinking water supplies, allowing facility operators, first responders and homeland security agencies to take early countermeasures against potential threats.

WaterSentry™, a United Defense product, was developed in partnership with Oak Ridge National Laboratory.
Chuck Lott, Audit, reported that the bylaws require an annual audit, and that this has traditionally been conducted internally. Chuck reported that this year, with the conclusion of a three-year Secretary-Treasurer term, a 3-year external audit was conducted by an external CPA firm, Wilson Price Barranco Blankenship & Billingsley P.C. of Montgomery, AL. Chuck reported that the audit found all accounts to be in order, and commended and thanked past-Secretary-Treasurer Tom Walters for his service to the Section. At the conclusion of the audit, a conference call was held in July with the Tay Knight, CPA, Chuck Lott, Tom Walters, and new Secretary-Treasurer Hunter Arnold to discuss the audit findings.

Suggestions that came out the audit were that the Board of Trustees should more regularly review the Section’s financial transactions (three times per year), and that the monthly account statements should be reviewed by the Section Trustees every month. Chuck Lott reported that these procedures have been officially adopted by the Section.

Hunter Arnold, Secretary-Treasurer, reported on the financial condition of the Section. Arnold thanked and commended Tom Walters for his service concluded and for his assistance in tutoring Arnold in the Secretary-Treasurer position. The Section is in good financial shape. The beginning checking account balance as of October 1, 2003 was $100,838.74. Through September 30, 2004 the Section has had receipts of $161,139.98 and disbursements of $154,848.81 for an ending balance of $107,129.91 as of September 30, 2004. In addition to the checking account, the Section has a 7-day renewable certificate-of-deposit that is valued at $194,858.00 as of September 30, 2004. Therefore, the total assets of the Section as of September 30, 2004 were reported as $301,987.91. During the year the Section paid for four scholarships valued at $2,000 each.

A motion was made and seconded to accept the financial report, and the motion was unanimously approved.

Darryl Jones, Program Chair, reported that we had a variety of technical sessions this year. He also mentioned a few schedule adjustments for the conference slate of technical sessions.

Keith Lowery, Entertainment, reported that we will have a show band named Second Coming at the banquet on Tuesday night. Also, one of our members, Chris Gill, will be performing at our “Meet and Greets” on Monday and Tuesday evenings. The Hypnotist Doc Holiday had performed at the dinner on Sunday night, and the musical group Splash performed Sunday afternoon at the reception.

Steve Hart, Exhibits, reported that we had 48 paid exhibitors. Lunch will be served in the Exhibit Hall.

Jarrod Shotts, Registration, expressed his thanks to the volunteers that had worked the Registration desk. Jarrod reported that we had approximately 200 pre-registered attendees with 93 spouses and 75 exhibitor attendees. There have been approximately 13 onsite registrants and an additional 3 spouses so far. 49 pre-registered have not checked in yet. Total conference registration is approximately 384.

Randy Chafin, Paid Staff. Randy reported on the paid staff activity. The Section’s strategic plan recommended that the Section hire staff, and the Section Manager Ken McCool has been on board for just over 1 year. Ken has traveled on Section business to Wichita, Denver, and Washington, DC. Randy announced that the Board of Trustees for the Section had yesterday voted to grant Ken McCool a 3-year contract with annual evaluations.

Ken McCool stated that after being a Section member for 26 years, he learned as Section Manager of the wealth of resources that AWWA has to offer, and he plans to help the AL/MS members to benefit from these resources. Ken encouraged the members to visit the Section’s website, which is recently renovated. See it at almsawwa.net.

Keith Lowery, Time and Place, reported that he and Jim Miller negotiated an agreement with the Grand Hotel in Point Clear, Alabama for the 2006 conference which will be held on October 9 – 12, 2006. Had also considered contracting with Perdido Resort, but dates were better at the Grand Hotel. The Grand Hotel has also made several improvements to facilities since the Section met there several years ago.

A motion was made and seconded to accept the recommendation of the Time and Place committee, and to hold the 2006 conference at the Grand Hotel in Point Clear, AL. The motion was approved unanimously.

Tony Owens, Memorial Scholarship, reported that the Scholarship Board was scheduled to meet in Tuscaloosa in November. Randy Chafin added that the scholarship program is being considered for expansion to more universities.
Sam McElroy, Education, reported that an education program has been launched in Alabama to provide training, and one of the objectives is to reach operations personnel that cannot regularly attend the annual conference. Sam expressed thanks to the many presenters that have contributed their time and energies, including Joel Rhaly, Jarrod Shotts, Allen Cox, and others. Topics have included Security, Selecting DIP, Corrosion, Ethics, and Crisis Management. A total of 260 professional development hours of training were provided during the year through this program.

Randy Chafin, Water For People Golf Tournament, reported that Mark Dolan has served as WFP Chair for this year, and that a golf tournament was held on Sunday afternoon. The golf tournament was held at Bay Towne Golf Club of the Sandestin Resort. The number of golfers was slightly down, possibly due to the recent hurricanes. The amount earned for WFP is not yet tallied.

Ken McCool had attended a WFP Workshop at AWWA national, and discovered that many AWWA Sections have more WFP events than just an annual golf tournament.

Diane Bailey, PIPELINE Editor, thanked the many advertisers and reported that the Pipeline magazine is now up to 40 pages, with $6,000 in advertising revenue. She is working on getting established as a nonprofit for mailing rates, which will save lots of money. She also reported that she is initiating a Classified section in the magazine, but needs ads to place there.

Randy Chafin, Website, reported that the website domain is no longer under the Birmingham Waterworks, so is no longer limited on advertising. Sponsors will be posted on the website.

Tom Walters, Resolutions, asked the members present to stand, and then read the following resolution.

RESOLUTION

WHEREAS, John McElroy, Jr., Paul Krebs, Thomas Mangum, Charles Reeves, and Carl Sims, were faithful and dedicated members of the Alabama-Mississippi Section of the American Water Works Association; and

WHEREAS, they contributed by their loyalty and service to the Association; and

WHEREAS, they were respected and loved by their friends in the Association; and

WHEREAS, the members of the Alabama-Mississippi Section of the American Water Works Association wish to recognize the loss of valued and trusted friends.

NOW THEREFORE, BE IT RESOLVED that the Alabama-Mississippi Section of the American Water Works Association meeting on this 18th day of October, 2004, in Sandestin, Florida, do hereby express their sorrow and regret over the loss of trusted and devoted friends; and

BE IT FURTHER RESOLVED that this resolution be spread upon the minutes of this meeting, and that a copy be sent to the families by our Secretary-Treasurer.

A motion was made and seconded to accept the resolution, and the motion was passed unanimously.

Jason Carter, Safety, read the recipients of this year’s (2003) safety awards:

Awards of Excellence:
- Limestone County Water & Sewer Authority
- Tuscumbia Water Department
- Mobile Area Water & Sewer System
- City of Northport

Awards of Merit:
- Arab Water Works Board

Small Systems, no report.

Ken McClellan, Nominations, submitted the following nominations as members of the AL/MS Section officers for 2003/2004.

- Chuck Lott – Chair
- Jim Miller – Vice-Chair
- Trustee-at-Large (AL) – Tom Walter
- Trustee-at-Large (MS) – Lee Jones
- Secretary-Treasurer (3-year term to expire December 31, 2006) – Hunter Arnold
- Director (3-year term to expire June 2007) – Blake Jeffcoat

After a motion from the floor was made to close the nominations, a second was made. Thereafter, upon a voice vote, all proposed nominees were unanimously elected.

The meeting was adjourned at 12:01 p.m.
**CHOCOLATE MATHEMATICS**

Make sure you do what this says and you will be surprised!!!!!!!
This is pretty neat how it works out. It’s cool chocolate math!!!
DON’T CHEAT BY LOOKING AT BOTTOM FIRST!

It takes less than a minute....Work this out as you read. Be sure you don’t read the bottom until you’ve worked it out! This is not one of those waste of time things, it’s fun.

1. First of all, pick the number of times a week that you would like to have chocolate (try for more than once but less than 10).

2. Multiply this number by 2 (just to be bold).

3. Add 5 (for Sunday).

4. Multiply it by 50 (Okay, go get the calculator)...

5. If you have already had your birthday this year add 1754...
   If you haven’t, add 1753.

6. Now subtract the four digit year that you were born.

You should have a three digit number. The first digit of this was your original number (i.e., how many times you want to have chocolate each week). The next two numbers are ......

YOUR AGE! ~ (Oh YES, IT IS!!!)

THIS IS THE ONLY YEAR IT WILL EVER WORK, SO SPREAD IT AROUND WHILE IT LASTS.
THANK YOU to all PIPELINE advertisers.
Your support of the AL/MS AWWA Section is appreciated.
Members, please remember these valuable sources when a need arises in your organization.

PIPELINE is a publication of the Alabama-Mississippi Section of the American Water Works Association.

PIPELINE is mailed to all members of the Alabama Mississippi Section. In addition to the members, the trustees voted to provide a complimentary copy to all community water systems within both states in an effort to keep all community water system officials informed on current events affecting the water supply industry and aware of products and services available to them. Current circulation is over 2700.

Articles and photographs are encouraged and appreciated. All submissions, comments or other matters concerning this publication should be directed to:
